

# Website Accessibility Statement

## Commitment to Accessibility

We are committed to ensuring our website is accessible to all users, including individuals with disabilities. Our design and development processes align with the Web Content Accessibility Guidelines (WCAG) 2.1 to enhance usability and inclusivity.

## What We Are Doing

When building and maintaining our website, we implement accessibility best practices, including:

- **Clear Page Titles** :Every page features a distinct and relevant title for easy identification.
- **Defined Language**: The language setting for each page is specified as English.
- **Keyboard Navigation**:Our website can be navigated using tab, enter, shift, and arrow keys, making it accessible for individuals with motor impairments.
- **Text Readability**: We ensure sufficient contrast between text and background (minimum contrast ratio of 4.5:1) for readability. Users can increase text size using browser zoom features or the keyboard shortcut `CTRL` + `+`.
- **Accessible Links**: Link text is designed to convey clear purpose without requiring surrounding context. Links are emphasized through boldness and underlining, aiding users with color blindness.
- **Alternative Text for Images**: All images include descriptive alt text to support screen readers.
- **Mobile Responsiveness**:Considering that more than 50% of online traffic originates from mobile devices, our website is thoroughly tested for responsiveness. Embedded elements, such as maps, calendars, social media feeds, and tables, are optimized for mobile use.
- **Form Accessibility**: Forms feature clear labels and are fully navigable via keyboard. They also maintain mobile compatibility for ease of use.

*We continuously strive to improve accessibility and welcome feedback on any barriers encountered when using our website.*
